HOPE FOR A 

CHANGE

By: Khada N. Acharya

welcome to my presentation

WHAT IS PHOTOGRAPHY?

Let's assume we all are photographer and we know that: Photography is the series of actions involving light or electromagnetic radiation to record images of objects on various surfaces.

Photography is the act of change that is against war and become great weapon against it.

As Alfred Eisenstaedt said, "When I have a camera in my hand, I know no fear."

This is what Photography does, show the reality and fear those who created war.

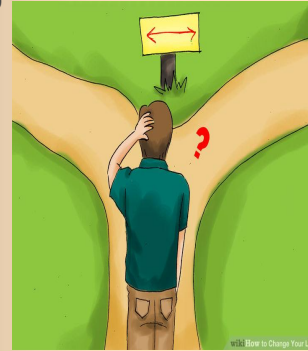

ONE CLICK OF CAMERA CAN CHANGE THE WORLD

As we all know or heard about photography changing the World. I know that one click of camera has changed the World , have changed and will be changing.

We could change the World by just going to war and fight against the enemies. But that is not what change means. It will create more war, war that will never end. Like present war that is going on Middle East.

As George Bernard Shaw Read said, "Progress is impossible without change, and those who cannot change their minds cannot change anything".

This true that we think we are progressing war against ISIS, but that is not true. We can't change middle east unless we change our mind and stop bombing those innocent we see through photography.

SOME EXAMPLE OF 10
PHOTOGRAPHS THAT HAVE
CHANGED THE WORLD.

1+2 Alan Kurdi & Dust Lady

3+4 Atomic Bomb & Point-Blank
Execution

5+6 Child Is Stalked & Khmer
Rouge Bones

7+8 Abu Ghraib Prison &

Bergen-Belsen
9+10 Terrified Girl Runs &
Tiananmen Square

Tiananmen Square

VIDEO??

I believe that we all have seen the Video of Omran Dagneesh, a syrian boy.

That is just an another form of Photography that show the reality and real problems which shocked the world. Even more it shocked when New York Boy Alex wrote a letter: Dear President Obama: "We Will Give Him a Family"

International Agency, Social Worker & Photography

Photography not only show the problems that is going around the world but encourage Doctors and other social workers to help the people who are suffering the problems. There will be good and bad people, even the international agency can be bad. Bad in the sense of making profits. For example: Some doctors use photography as a profits to them by testing the vacation that they developed. Whereas some use it as the methods to save a child of "Mother Nature", who might become like them and help other as they help those child.

WHAT IS GRAPHIC DESIGN?

Graphic design is the art or skill of combining text and pictures in advertisements, magazines, or books.

It is the way of creating and combining symbols, images and text to develop a visual representation of ideas and message.

As Edgar Degas said, "Art is not what you see but what you make others see".

This is what Graphic designers do, they show other people to see what is happening around the world and show other people to see the impacts of certain things. Example: Bombing innocent Syrian people.

Graphic Design Relationship with Photography

As I mentioned before that photography is an act of change that is against war and it stands as a weapon to end the war that creates more problems. Change might not happen unless it gets a fine touch on Photoshop. It is the change due to the Graphic Design helping the photographer to create a unique movement that the photographer can't see but make a movement that others see what is going on in photographs. So Graphic design is like a key to open the important message that is locked in photographs.

Today is the hope of the future! The future begins right here, right now, with the "One Click of Camera" & "Fine Touch of Photograph in a Photoshop."

**DO You
have ANY
Question?**

**DON'T HESITATE
TO ASK
WHETHER I CAN
OR CAN'T
ANSWERS.**

Thank you for
watching and
listening my
presentation.

Life is not a
problem to
be solved
But reality
to be
experinced
